ARTICLE 4
TRADE JURISDICTION AND WORK CLASSIFICATION

Art. 4(b) "It shall be within the Boilermakers' jurisdiction that the unloading and loading of materials which the Boilermakers are to erect; if such materials are shaken out, separated, segregated, and stored for any period of time. When said material is again loaded and unloaded on a conveyance and transported to the job for erection it shall be unloaded and erected by the Boilermakers."

Art. 4(c) In joint review of the above, it was agreed that the following shall apply:

Art. 4(d) The Union wishes only to protect and not to expand, its historical jurisdiction over unloading and loading of Boilermaker materials. Also, the Union's claims are not extended to apply to material that is in trans-shipment at a transfer point.

Art. 4(e) The Contractor agrees that he will not sub-contract such work for the purpose of encroaching on the historical jurisdiction of the Union.

Art. 4(f) In the event a disagreement or dispute arises with regard to the historical jurisdiction

as outlined in the Union's claim, each specific case may be processed between the Union and such Contractor involved in accordance with the governing language of the Agreement.

Art. 4(g) The work of the Boilermaker (Journeyman or Mechanic) shall include: Boilermaking, Welding, Acetylene Burning, Signaling, Loading, Unloading, Heating, Chipping, Caulking, Rigging, Riveting, Bucking-up, Fitting up, Grinding, Scaffold Erecting, Reaming, Impact Machine Operating and such other work as is generally regarded as Boilermaker (Journeyman or Mechanic) work. Any employee classified as a Boilermaker shall perform any of the foregoing work of which he is capable. A Helper may not perform lay-out work, certified welding, crane signaling, or supervise in any capacity. A Helper may perform any other work in which he or she is capable.
