**IMPORTANT NOTICE TO AWARDING BODIES AND
OTHER INTERESTED PARTIES CONCERNING THE NEW
AMENDMENTS TO LABOR CODE SECTION 1720(a)**

The passage of Senate Bill 975 (Chapter 938), effective January 1, 2002, codifies existing Department of Industrial Relations' administrative decisions on appeal and determinations regarding the above referenced statute. This statute, among other things, also expands the definition of "public funds" for purposes of the Prevailing Wage Law and adds "installation" to the definition of construction. Chapter 938 also provides for certain specified exemptions to the new definition of "public funds."

In accordance with SB 975, its terms will be strictly enforced for all public works projects advertised for bids on or after January 1, 2002, except for those projects that that would have been covered under the Department's public works coverage determinations or decisions on appeal made precedential prior January 1, 2002, in which case there is an independent basis for enforcement of projects advertised for bid prior to January 1, 2002.

**IMPORTANT NOTICE TO AWARDING BODIES AND OTHER INTERESTED PARTIES
CONCERNING INSPECTION AND SOILS AND MATERIALS TESTING**

Dear Public Official/Other Interested Party:

This notice provides clarification to many questions from the public regarding the scope of work of the testing and inspection determinations. In addition, it answers many questions from the public regarding work performed by architects and engineers.

Attached please find letters from Operating Engineers Local Union No. 3 dated February 4, 2002, and Operating Engineers Local Union No. 12 dated December 6, 2001, clarifying the scope of work for the following determinations:

**SOUTHERN CALIFORNIA
BUILDING/CONSTRUCTION INSPECTOR AND FIELD SOILS AND MATERIAL TESTER, page 10E**

**SAN DIEGO COUNTY
BUILDING CONSTRUCTION INSPECTOR AND FIELD SOILS AND MATERIAL TESTER, page 27C**

**NORTHERN CALIFORNIA
OPERATING ENGINEER (Heavy and Highway Work): Group 6 (Soils and Materials Tester), page 39
OPERATING ENGINEER (Building Construction): Group 6 (Soils and Materials Tester), page 40A**

Scope of work for each of these classifications has been posted on the Internet at <http://www.dir.ca.gov/DLSR/PWD>. This information may also be requested from the Division of Labor Statistics and Research, Prevailing Wage Unit by calling (415) 703-4774, by faxing a request to (415) 703-4771 or by writing to:

California Department of Industrial Relations

When referring to questions 7 and 8 in the letters from Operating Engineers Local No. 3 and Local No. 12 respectively, please note that testing and inspection is covered at off-site manufacturing and/or fabrication facilities only if the off-site facility is determined covered under prevailing wage laws. If there are any questions pertaining to this area please contact the Division of Labor Statistics and Research at the above address. Please include all relevant documents including but not limited to the contract, financial documents, plans, specifications, as well as contact information for the Awarding Body.

Please refer to an Important Notice dated December 29, 2000 for additional information pertaining to testing, inspection, and field surveying.

Sincerely,

REGARDING MODIFICATIONS OF THE PREDETERMINED INCREASES
IN THE DIRECTOR'S GENERAL PREVAILING WAGE DETERMINATIONS**

Dear Public Official/ Other Interested Parties:

The following is the modification of the predetermined increases for the following craft and classifications listed below:

CRAFT: Electrician

CLASSIFICATION(S): Sound Installer (All Shifts) and Sound Technician (All Shifts)

LOCALITY: Kern County

DETERMINATION: KER-2012-1 and KER-2012-2

The effective dates for the predetermined wage increases applicable to the classification(s) listed above have been **modified** as follows:

Instead of December 1, 2013, the new effective date is November 25, 2013.

Instead of June 1, 2014, the new effective date is May 26, 2014.

With the exception of the modifications stated above, predetermined increases, wage rates, and other conditions found in the above referenced prevailing wage determinations remain unchanged.

RE: Prevailing Wage Determination - Soils and Materials Tester (SMT) On Site

Dear Ms. Robbins:

Please find enclosed the response of Operating Engineers Local Union No. 3 in support of a Prevailing Wage Determination for a Soils and Materials Tester as set forth in the Master Construction Agreement for Northern California.

The data enclosed, we believe, justifies and establishes the Scope of Work Conforming to SB1999 for a Soils and Materials Tester performing on-site work in Northern California.

We respectfully request that a conclusive determination be made that the wage rates and fringe benefit rates applicable to this classification are the prevailing wage for this type of work within the geographical jurisdiction established in the Master Agreement and are consistent with the requirements of SB1999.

Your continuing assistance is appreciated. If there are any further questions, do not hesitate to contact myself or Dean Dye at 510/748-7400.

Sincerely,

Robert E. Clark,

**DEPARTMENT OF INDUSTRIAL RELATIONS
STATE OF CALIFORNIA
CLARIFICATION REQUEST - SOILS & MATERIALS TESTER (SMT)
WITH
OPERATING ENGINEERS LOCAL 3'S RESPONSES**

1. Summarize the intent of the coverage of the SMT classification in your No. CA Master Agreement, which serves as the basis for the prevailing wage determination.

All visual, physical and non-destructive testing that is done at a jobsite, on-site lab, fabrication site (yard), or off-site lab used exclusively for covered work.

2. Define the following and indicate if done by the SMT classification:

- a) Magnetic particle testing -- used for welding, laminations and other steel inspections; done by SMT
- b) Non-destructive inspection -- used for welding, laminations and other steel inspections; done by SMT
- c) Ultrasonic testing -- used for welding, laminations and other steel inspections; done by SMT
- d) Keying -- excavation at the toe of a slope; done by equipment operator
- e) Benching -- process of removing noncompacted or "soft" soil in order to properly place the compacted soil on unyielding materials; done by equipment operator
- f) Scarifying -- process of ripping or otherwise preparing the existing surface; done by equipment operator
- g) "Rolling of slopes" -- process of compacting the slope to the required density (also called "back rolling"); done by equipment operator
- h) One-pointer -- test made to roughly determine the weight and maximum density of the soil being used as fill material; done by SMT
- i) "Correction for rock" -- used during a compaction test to mathematically remove all oversize rock from the equation; done by SMT

3. Does lab work fall within the jurisdiction of the SMT? Does the on/off site location of the lab make a difference?

Lab work done offsite normally does not fall under the Construction Inspectors jurisdiction. If a field lab is set up at the project site in the field, it then falls under the Construction Inspectors jurisdiction.

4. What is the civil engineer's job when working with the SMT? Is the civil engineer covered under the scope of the SMT sections of the collective bargaining agreement (CBA)?

A Civil Engineer generally provides direction, plan interpretation and engineering type decisions. They may be either on- or off-site (depends on the nature of the project). They generally do not do the Construction Inspector type work; but if they do, then it is covered work.

5. The MLA (p.5) lists employees excluded from coverage. Does this imply that engineers and architects, project managers, off-site laboratory workers are excluded?

Engineers, Architects, Project Managers, off-site Lab Workers, as long as they do not perform the Construction Inspector work, would not be covered.

6. Some signatories perform mechanical & electrical inspections. Are these jobs covered under the Operating Engineers Agreement? If so, how is work performed?

We (OE3) consider Mechanical Inspectors to be covered by our CBA, therefore the prevailing wage (at the SMT rate) would be paid. Electrical should be covered work by the electrical craft.

7. Regarding manufacturing sites, if inspectors visit plants, is that inspection of the plant and its processes covered under the Agreement, is that the intent of SB1999?

Steel fab shops, concrete and asphalt batch plants, prestressed yard and fabrication shop, etc. (such as those for piles & girders, gul lam beams) is covered work under the intent of SB1999, including mechanical and electric.

8. Are the following inspectors included in the scope of the agreement: Geotechnical, Concrete, Painting, Steel and Electrical?

Concrete, Steel, Painting and Electrical Inspectors are covered work. Also Inspectors such as Roofing, Mechanical (HVAC), Suspended Ceiling, Plumbing, Geotechnical (unless registered Geologists/Engineer is specifically required by the plans & specs) Masonry, Fireproofing, Gul lam beams, Shotcrete, etc. In essence all inspection as required by the Uniform Building Code (UBC) is considered covered work.

9. Is visual observation inspection covered? For example: Using tape measures...

The Construction/Special Inspector shall observe the work for conformance.....” is part of the UBC requirements. The majority of inspection work is visually by nature. Slump of concrete, length of weld, depth of footings, pile caps, width of footings, pile caps etc. are but a short list of work that a Construction Inspector would use a tape measure for.

10. What is the difference between a Geotechnical Inspector and a Geotechnical Engineer? Are they covered under the Operating Engineer Agreement?

A Geotechnical Engineer normally would be a registered person with a college degree. They may be a Geologist/Engineer in training also. Geotechnical Engineer performs/supervises the analyses, design and documents preparation associated with the geotechnical aspects of the project. They would not normally be covered, unless doing Construction Inspector work.

A Geotechnical Inspector ascertains through inspection and/or testing that the Geotechnical Engineer's requirements/recommendations are complied with. A Geotechnical Inspector would normally be covered.

11. Is a Project Manager whose duties include weekly meetings, approving, contracts, managing engineers, managing subcontracts and preparing monthly reports be covered under the CBA?

A Project Manager, (who would normally not be doing construction inspection work) would not be covered.

12. Is a Resident Engineer whose duties include logging correspondence amongst contractors and subcontractors, performing soil, concrete, masonry, and HVAC tests, and acting as a liaison between contractors and engineers be covered?

Resident Engineers, normally a professional registered person is not covered unless doing Construction Inspector work (such as performing soils, concrete, masonry & HVAC tests).

13. Is the SMT an apprenticeable classification?

Yes.

14. Is inspection of bridges and piers covered under the SMT classification under Operating Engineers Local #3's agreement?

Yes.

The following, in addition to the above, are also considered covered inspection work: high strength bolting; shearwall & diaphragms; metal connectors, anchors or fasteners for wood construction; piling; drilled piers; caissons; bolts installed in concrete; post tensioning steel; pre-stressed steel. Also includes, but not limited to, underground construction (sewers, gas lines, drainage devices, water lines, backfilling, welding, bedding). SMT rates apply.

Re: Building Construction Inspector (BCI) and Field Soils and Material Tester (FSMT) Classifications

Dear Ms. Robbins:

Pursuant to your request for clarification contained in your November 20, 2001 correspondence we submit the following:

1. *What is the difference between the Building Construction Inspector (BCI) and the Field Soils and Materials Tester (FSMT) classifications? There appears to be some overlap of duties. Could you summarize the intent of the coverage between Southern California Contractors Association, Inc. and the International Union of Operating Engineers Local No. 12, which serves as the basis for the prevailing wage determination?*

As stated in our June 5, 2001 correspondence to your office, a Building Construction Inspector (BCI) is a licensed inspector who generally works under the direction of a registered civil engineer. The BCI is used when higher stresses are involved, e.g., welding, reinforced concrete, masonry, non-destructive testing and other related disciplines. The term "building inspector" or "construction inspector" has the same meaning as "special inspector." The BCI classification is meant to include inspection of all structures, including but not limited to, residential and commercial buildings, bridges, piers, warehouses, oil/water tanks, docks, refineries, heavy highway construction, underground construction, water works, sewers, water reclamation, flood control, dams, dredge, etc.

A field soils and material tester (FSMT) performs a variety of duties. They include special grading, excavation filling, soils used in construction, concrete sampling, density testing and various types of verification tests.

Occasional overlap of duties may occur between the BCI and FSMT, such as taking concrete specimens in the field, however, one must look at the overall scope of work/duties to determine the proper prevailing wage/rate classification.

2. *How is grading inspection different when performed by a BCI or by a FSMT?*

"Grading inspection is generally the work of a FSMT. The City of Los Angeles certifies/licenses grading inspectors whose duties are similar, but more stringent than those of the FSMT. The grading inspector in the Los Angeles area is covered under the BCI classification/wage rate.

3. *Please define the following and identify which classification performs this work:*

- a) *Magnetic particle testing*
- b) *Nondestructive inspection*
- c) *Ultrasonic testing*
- d) *Keying*
- e) *Benching*
- f) *Scarifying*
- g) *"Rolling of slopes"*
- h) *One-pointer*
- i) *"Correction for rock"*

a) b) c) Magnetic and ultrasonic testing are two different forms of non-destructive testing (NDT). They use mechanical devices to check defects in structures such as welds. The use of magnetic and ultrasonic waves in the evaluation process does not cause any damage to the structure, hence, the term non-destructive testing. Other forms of non-destructive testing include radiography (x-rays) and penetrant testing. All of this work is that of the BCI.

d) Keying in is benching into existing material while filling up an adjacent fill, to bind the two areas (materials) together, eliminating the chance of a soft or uncompacted area in between the two materials or areas. A "stair-step" procedure is usually used.

e) Benching is using a piece of equipment (usually a dozer) to cut into existing material while filling up an adjacent fill, to bind the two areas (materials) together. This eliminates the chance of soft or uncompacted area in-between the two materials or areas. A "stair-step" procedure is usually used.

f) Scarifying is a procedure performed by equipment that rips up existing material approximately one foot deep, then processing that material by watering and mixing it.

g) Rolling of Slopes is a compaction technique used on the slopes of a new fill area. The time required for compaction on the slope of a fill is the same as the required compaction on the top of the fill.

h) A One-Pointer is one test made on the soil by a field soils and material tester (or FSMT).

i) Correction for Rock is a calculation made for oversized rock in soil, done by a field soils and material tester (FSMT).

Items a, b and c are performed by the BCI. Items d, e, f, g, h and i are performed by the FSMT.

To perform items a, b, and c, the individual would have to obtain certification as required by the agency. If certified, for example, in "Ultrasonic Testing," one could perform FSMT work and then move to BCI work if certified to do so.

4. *Does lab work fall within the jurisdiction of the BCI? Does the on/off site location of the lab make a difference?*

No, lab work is not covered. If a lab is located on-site and the individual stays "inside" the lab, there is no coverage. However, if the individual goes on-site and performs "field work," then he or she is covered for all hours worked.

5. *What is the civil engineer's job when working with the BCI or FSMT? Is the civil engineer covered under the scope of the BCI or FSMT sections of the collective bargaining agreement (CBA)?*

The civil engineer usually acts in a supervisory role, directing the BCI or FSMT activities. The civil engineer work would not be covered unless he or she performs "field work."

6. *The Master Labor Agreement (page 5) lists employees excluded from coverage. Does this imply that engineers, architects, project managers and off-site laboratory workers are excluded?*

Yes.

7. *Some signatories perform mechanical & electrical inspections. Are these jobs covered under the Operating Engineers agreement? If so, how is work performed?*

Not covered.

8. *When inspectors visit manufacturing sites, is the inspection of the plant and its processes covered under the agreement? Is that the intent of SB 1999?*

Yes, pursuant to the agreement. The intent of SB1999 was to further define coverage in the public work arena.

9. *Are the following inspectors included in the scope of the agreement: Geotechnical, Concrete, Painting, Steel and Electrical?*

Geotechnical, yes. Concrete, yes. Painting, no. Steel, yes. Electrical, no.

10. *Is visual observation inspection (e.g., using tape measures) covered?*

Yes. Visual inspection is a component of the Inspector's duties.

11. *What is the difference between a Geotechnical Inspector and a Geotechnical Engineer? Are they covered under the Operating Engineer agreement?*

A Geotechnical Inspector is "on-site" performing the "field work" and is covered. The

Geotechnical Engineer is usually "in-house," a supervisory position, "off-site."

12. *Is a project manager whose duties include weekly meetings, approving contracts, managing engineers, managing subcontracts and preparing monthly reports covered under the CBA?*

No.

13. *Is a resident engineer whose duties include logging correspondence amongst contractors and subcontractors, performing soil, concrete, masonry and HVAC tests, and acting as a liaison between contractors and engineers covered?*

When a Resident Engineer logs correspondence among contractors and subcontractors, the work is not covered. When the Resident Engineer acts as a liaison between contractors and engineers, the work is not covered. When performing soil, concrete or masonry tests, the work is covered. HVAC tests are not covered.

14. *Is the BCI an apprenticeable classification?*

Yes.

15. *Is the FSMT an apprenticeable classification?*

Yes.

16. *Is inspection of bridges and piers covered under the BCI and/or FSMT classifications under your agreement?*

Yes. Please see the coverage language in the CBA. Both classifications are covered pertaining to bridge work.

We hope the information provided herein is beneficial to you. Please call this office if you should have any questions.

Sincerely,

**IMPORTANT NOTICE TO AWARDING BODIES AND OTHER INTERESTED PARTIES
CONCERNING INSPECTION, FIELD SURVEYING AND SOILS TESTING**

The passage of Senate Bill 1999 (Chapter 881), effective January 1, 2001, codifies existing Department of Industrial Relations administrative decisions, determinations and regulations concerning the above referenced work. This work when done on or in the execution of a "Public Works" project requires the payment of prevailing wages. In accordance with SB 1999, Inspection and Testing determinations will be strictly enforced for all public works projects advertised for bids on or after January 1, 2001. Field surveying determinations have been and will continue to be enforced for all public works projects.

The classifications that perform this work have been published in the Director's General Prevailing Wage Determinations for over 20 years and can be found on the Basic Trades pages (Building Inspection, Soils Testing) and on the individual county sheets (Field Surveying). For the basic trades, please use the following determinations:

SOUTHERN CALIFORNIA

OPERATING ENGINEER, Group 2 (Soils Field Technician), page 7
BUILDING CONSTRUCTION INSPECTOR (OPERATING ENGINEER), page 10E

SAN DIEGO COUNTY

NORTHERN CALIFORNIA

OPERATING ENGINEER (Heavy and Highway Work): Group 6 (Soils and Materials Tester), page 39
OPERATING ENGINEER (Building Construction): Group 6 (Soils and Materials Tester), page 40A

Advisory scope of work covered by each of these classifications has been posted on the Internet at <http://www.dir.ca.gov/DLSR/PWD>. This information may also be requested from the Division of Labor Statistics and Research, Prevailing Wage Unit by calling (415) 703-4774, by faxing a request to (415) 703-4771 or by writing to:

In addition, Director's precedential Public Works coverage determinations concerning inspection and testing work will be enforced for all public works projects advertised for bids on or after the dates the precedential decisions were designated as such. For determinations of the applicability of prevailing wage requirements to other work covered by SB 1999, please contact the Division either via fax number or by mailing your request to the address indicated above. Requests of this nature should include all of the relevant documents including, but not limited to, the contract for the work and a detailed description of the work to be performed. Future clarifications regarding the scope and application of Senate Bill 1999, if needed, will be posted on the DLSR website and mailed to those on the Prevailing Wage mailing list.

**Important Notice to Awarding Bodies and Other Interested Parties
Regarding Shift Differential Pay in the Director's General Prevailing Wage Determinations**

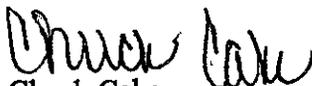

Dear Public Official/Other Interested Parties:

The Director's General Prevailing Wage Determinations includes shift differential pay for various crafts used on public works projects. This notice is to clarify the worker's eligibility to receive the shift differential pay when working on a public works project. Please note that not all crafts have shift differential pay published in the Director's General Prevailing Wage Determinations.

When a worker is required to work a regular shift, he/she must be paid the applicable craft rate from the Director's General Prevailing Wage Determinations for the construction activity he/she is performing. However, when a worker is required to work a shift outside of normal working hours, he/she must be paid the shift differential pay according to the shift he/she is working. For example, if only one shift is utilized for the day, and the work being performed is during the hours typically considered to be a swing (second) shift or graveyard (third) shift, the worker employed during the hours typically considered to be a swing shift or graveyard shift must be paid the shift differential pay for the shift he/she is working. If multiple shifts are used for the day, the worker working on the second or third shift must be paid according to the shift he/she is working.

Please refer to the contract provisions posted on the Internet at www.dir.ca.gov/DLSR/PWD for the working hours applicable to the craft/classification published in the Director's General Prevailing Wage Determinations, which has a swing shift and/or a graveyard shift.

CONCERNING BURGLAR ALARM AND FIRE ALARM INSTALLATION**

Dear Public Official/Other Interested Parties:

This notice provides clarification and updates the June 27, 2002, Important Notice regarding the applicable rate of pay for work involving the installation of burglar and fire alarms.

In the following counties, the minimum rate of pay for **burglar alarm** installation would be that of the craft/classification of Electrician/Comm & System Installer: Los Angeles and Orange.

In the following counties, the minimum rate of pay for **fire alarm** installation would be that of the craft/classification of Electrician/Comm & System Installer: Contra Costa, Orange, and Santa Clara.

In Imperial and San Diego Counties only, the minimum rate of pay for **burglar alarm** and **fire alarm** installation would be that of the craft/classification of Electrician/Sound & Signal Technician.

Please note that the minimum rate of pay for all conduit installation associated with either alarm system installation would be that of the craft/classification of Electrician/Inside Wireman.

Please refer to the county determinations to find the rates for the classifications referenced above. The scope of work for each of these classifications is posted on the Internet at <http://www.dir.ca.gov/DLSR>. Dear Chuck,

I hope the information below will help you.

For C7 licensed contractors with whom CWA holds a collective bargaining agreement in the State of California, I believe the following statement covers 95 % of work performed by our members.

The scope of work that CWA members perform requires the running of conduit from time to time. This conduit work is typically coincidental to Telecommunications work and normally in telecommunications rooms / closets. Usually the conduit run is not longer than 10 feet.

Sincerely,

Bill Quirk

IMPORTANT NOTICE TO AWARDING BODIES AND OTHER INTERESTED PARTIES CONCERNING BURGLAR ALARM AND FIRE ALARM INSTALLATION

Dear Public Official/Other Interested Parties:

This notice amends the March 5, 2003, Important Notice regarding the minimum rate of pay for work involving the installation of burglar and fire alarms in **Imperial** and **San Diego** Counties.

The minimum rate of pay for burglar and fire alarm installation would be that of the craft/classification of Electrician/Soundman when performing the following: installing, terminating, operating, assembling, wire pulling, splicing, and installing devices.

The minimum rate of pay for burglar and fire alarm installation would be that of the craft/classification of Electrician/Sound and Signal Technician when performing all other work including but not limited to the following: layout, planning, final checkout, servicing, and maintenance.

Please note that the minimum rate of pay for all conduit installation associated with either alarm system installation would be that of the craft/classification of Electrician/Inside Wireman.

Please refer to the county determinations to find the rates for the classifications referenced above. The scope of work for each of these classifications is posted on the Internet at <http://www.dir.ca.gov/DLSR>. This information may also be requested from the Division of Labor Statistics and Research, Prevailing Wage Unit by calling (415) 703-4774, by faxing a request to (415) 703-4771 or by writing to:

DECISIONS ON APPEAL

TO AWARDING BODIES AND OTHER INTERESTED PARTIES CONCERNING THE APPLICATION AND SCOPE OF PUBLIC WORKS COVERAGE DETERMINATIONS:

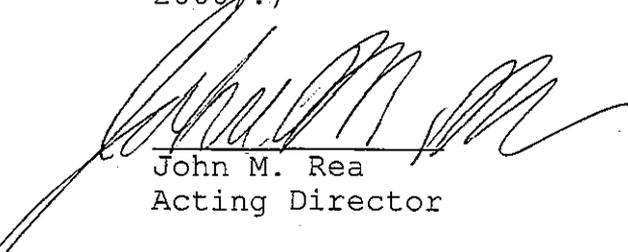

PW CASE NO. 2000-027: CUESTA COLLEGE/OFF-SITE FABRICATION OF SHEET METAL

AND

PW CASE NO. 2002-064: CITY OF SAN JOSE/SJSU JOINT LIBRARY PROJECT/OFF-SITE FABRICATION OF ELECTRICAL COMPONENTS

On March 4, 2003, the Acting Director of the Department of Industrial Relations issued the above-referenced precedential public works coverage determinations concerning public works coverage of off-site fabrication. As a result of the filing of administrative appeals from these determinations pursuant to 8 California Code of Regulations, section 16002.5, the implementation of the public works coverage tests enunciated in the determinations was stayed effective March 4, 2003.

The appeals are decided and, effective immediately, the determinations are withdrawn. The prior precedential public works coverage determinations and decisions on appeal concerning the issues in these determinations control. RE: Enforcement of Prevailing Wage Obligations for On-Haul and Off-Haul Trucking By Owner-Operators Not Employed by Material Suppliers

Dear Interested Parties:

This notice is in response to the various letters I have received regarding enforcement of prevailing wage obligations for owner-operator truck drivers hauling material and equipment to and from public works sites.

It has been this Department's policy that owner-operators, including owner-operator truckers, performing public work must be paid prevailing wages.¹ It appears, however, and as some of you have acknowledged, the majority of the Department's enforcement of prevailing wage obligations has concerned owner-operators (of any kind) performing work within a public works site.²

In light of the Department's enforcement experience and its current consideration of appropriate wage rates for owner-operators performing on-haul and off-haul trucking, enforcement of prevailing wage obligations for such work is stayed pending DLSR's establishment of the appropriate rates, including a formula for applying them to the unique circumstances of owner-operator compensation.³

In addition, the rates established by DLSR for owner-operator truckers performing off-haul and on-haul deemed to be public work will be applicable to all work advertised for bid on or after the date of the rates issued by DLSR.⁴

Sincerely,

/s/John M. Rea
Acting Director

¹ Under *O. G. Sansone Co. v. Department of Transportation* (1976) 55 Cal.App.3d 434, 458, 127 Cal.Rptr. 799, this excludes owner-operators employed by material suppliers.

² Almost all prevailing wage complaints involving owner-operators performing on-haul and off-haul trucking appear to have come in after the request for a determination or after the issuance of the determination.

³ Labor Compliance Programs are required to enforce prevailing wage obligations in a manner consistent with the enforcement policies of DLSE (title 8, California Code of Regulations, section 16434). Thus, Labor Compliance Programs are directed to observe the same stay policy as described herein.

⁴ Consistent with the Department's enforcement policy, if an awarding body does not advertise the public works project for bid, other benchmarks events, including the first written memorialization of the agreement concerning the public works elements of project or the contract governing the award of public funds will be utilized instead. See e.g., Baldwin Park Market Place, City of Baldwin Park, Public Works Case No. 2003-028, October 16, 2003.

**IMPORTANT NOTICE TO AWARDING BODIES AND OTHER INTERESTED
PARTIES CONCERNING FIRE ALARM INSTALLATION**

Dear Public Official/Other Interested Parties:

Based on a recent investigation conducted by the Department, it has been determined that the minimum rate of pay for fire alarm installation work in **Los Angeles County** would be that of the craft(s)/classification(s) contained in the Southern California Ninth District Sound and Communications Agreement by and between International Brotherhood of Electrical Workers and National Electrical Contractors Association. These craft(s)/classification(s) include the following:

Electrician/Communication and System Installer
Electrician/Communication and System Technician
Electrician/Sound Electrician

These changes apply only prospectively to public works projects advertised for bid on or after November 20, 2005.

To view the current rates and scope of work provisions for these craft(s)/classification(s), please visit our Internet website at <http://www.dir.ca.gov/DLSR/PWD>. SUMMARY OF IMPORTANT NOTICES CONCERNING BURGLAR ALARM AND FIRE ALARM INSTALLATION

Dear Public Official/Other Interested Parties:

The Department has issued four important notices (June 27, 2002, March 5, 2003, February 25, 2004, and November 10, 2005) regarding the prevailing rate of pay for burglar alarm and fire alarm installation. Each important notice has only prospective effect (applies only to projects advertised for bids on or after the tenth day of issuance). The tables on the following two pages provide a summary of the applicable rates of pay by county for burglar and fire alarm installation as contained in each of the important notices issued for these types of work. The information in these tables **does not** alter the applicable rates of pay issued in the aforementioned important notices.

Please note that minimum rate of pay determinations are issued on a "project-by-project basis." If you have a public works project in one of the counties listed in the tables that indicates "project-by-project basis," you may request a minimum rate of pay determination prior to the bid advertisement date of the project by sending a written request to the address below. Each request should include all the relevant documents that would assist the Department in issuing a determination. These documents include but are not limited to the contract, financial documents, plans, specifications, as well as contact information for the Awarding Body.

REGARDING
THE PREVAILING WAGE RATES BELOW THE CALIFORNIA MINIMUM WAGE**

In accordance with Labor Code Sections 1770, 1773, and 1773.1, the Director of the Department of Industrial Relations is responsible for determining the prevailing wage rates for each worker employed on public works projects of more than \$1,000.

Effective on January 1, 2007, the minimum wage in California will increase to seven dollars and fifty cents (\$7.50) per hour. Effective on January 1, 2008, the minimum wage in California will increase to eight dollars (\$8.00) per hour. The Director's prevailing wage determinations shall not be below the California minimum wage. Each employer is required to pay at least the California minimum wage for the basic hourly rate in all cases where the published prevailing wage rate is below the California minimum wage. Any and all employer payments required by these determinations must also be paid.

If the California minimum wage is increased in the future to an amount above that shown in a prevailing wage determination, the basic hourly rate in that determination automatically increases to the new minimum wage.

AND OTHER INTERESTED PARTIES
REGARDING THE DETERMINATIONS ISSUED ON FEBRUARY 22, 2007 FOR
METAL ROOFING SYSTEMS INSTALLER (PAGES 2J - 2J-15)**

Dear Public Official/Other Interested Party:

The Division of Labor Statistics and Research (DLSR) found through the Metal Roofing Systems (Commercial Construction) Statewide Wage and Benefits Survey that there is insufficient or no data to establish a mode for metal roofing in **Alpine, Colusa, Del Norte, Glenn, Imperial, Inyo, Kern, Kings, Lake, Mariposa, Merced, Modoc, Mono, Nevada, Plumas, San Benito, San Luis Obispo, Santa Cruz, Sierra, Sutter, Tehama, Trinity, and Tuolumne** counties. The Director of Industrial Relations determined that the minimum acceptable rate for metal roofing in these counties would be one of the four rates which DLSR publishes as prevailing through broad areas of California (i.e. the Carpenter, Iron Worker, Roofer and Sheet Metal Worker rates published in the General Prevailing Wage Determinations).

These will remain the minimum rates unless and until the rate is successfully challenged, in the context of a specific job with payroll evidence that another rate prevails, under Labor Code Section 1773.4 (for a specific project) or should another party submit payroll data showing that there is a single rate prevailing in a broad labor market which includes these counties or for one of these counties, via petition meeting the requirements of under Title 8, California Code of Regulations section 16302. We will require, as the survey did, actual payroll data linked to a project on which a metal roof was installed by the worker paid that rate. Please note that in the successfully challenged county(ies), a wage and benefits survey will be conducted to determine the prevailing wage rate for this type of work.

TO AWARDDING BODIES AND INTERESTED PARTIES
REGARDING OVERTIME ON PUBLIC WORKS**

The Department has received several inquiries regarding whether it would be appropriate to refer to the contract provisions for a craft, classification, or type of worker in cases where the prevailing wage is based on a collective bargaining agreement to determine the overtime requirements for public works.

Contract provisions that allow for employees to work alternative workweek schedules in which they may work more than 8 hours per day without overtime pay do not apply to work performed on public works. The laws and regulations governing prevailing wages require that employees of contractors on public works be paid not less than 1-1/2 times the basic rate of pay for all hours worked in excess of 8 hours per day and 40 hours during any one week. In addition, overtime compensation may be required at a higher rate than 1-1/2 times the basic rate of pay, for less than 40 hours in a standard workweek, or for less than 8 hours in a calendar workday as specified in the prevailing wage determination. Contractors are required to pay overtime pursuant to Labor Code sections 1810-1815 and as indicated in the prevailing wage determination. Therefore, please refer to Labor Code sections 1810-1815 and the prevailing wage determination and not the contract provisions for each particular craft, classification, or type of worker to obtain the applicable requirements for overtime hours and rates of pay.

Clarification of the Notice dated October 8, 2008 for the off-the-site Hauling of Construction Materials

This is a clarification based on questions and comments from industry sources that should help employers and unions better respond to the previously mailed and posted request for data to determine prevailing wage rates for off-the-site hauling of construction materials.

DLSR is requesting information from three sources for off-the-site hauling: a) the construction employers who employ drivers to haul materials to and from the construction site, b) the material suppliers, and c) the trucking companies who haul construction materials.

The following is provided to help clarify the information DLSR has requested:

- A description of the trucks as to type (dump, low boy, transit mixer, etc.) and their size (cubic yards, number of axles*, tonnage, or gross vehicle weight, etc.) that are used as the basis for the different pay rate classifications.
- Provide the actual payroll records that show the peak day of employment for each county (peak day is defined as the single day when the greatest number of workers perform the off-the-site hauling in the last 12 months and the rates these employees were paid).
- The construction site where the deliveries were made or material was picked up will determine the County for counting peak employment.
- Both public and private work are to be combined in submitting data.
- For purposes of this investigation, it is possible that the same employee can be counted two or more times if the employee worked more than one county on the same day.
- Likewise, an employee-driver can be counted two or more times if the driver worked at more than one pay rate classification on the same day.

Note this request for information is only for workers engaged in hauling of construction materials off-the-site of construction. The payroll records must be submitted to support the data provided above. If necessary, the payroll records may be supplemented with written comments to further explain the data.

Confidentiality:

Individual employer or employee wage data or payroll information provided is confidential and will be used for statistical purposes only. Direct testimony given at a public hearing is not confidential

**IMPORTANT NOTICE TO AWARDING BODIES AND INTERESTED PARTIES
REGARDING PREVAILING WAGE DETERMINATIONS
FOR RESIDENTIAL PROJECTS**

The Division of Labor Statistics and Research (DLSR) will no longer issue residential wage rates as special prevailing wage determinations pursuant to the California Code of Regulations Section 16202. Effective January 26, 2009, the DLSR will make available on demand residential prevailing wage determinations for those crafts/classifications which are on file with the DLSR to any interested party upon request. This does not alter the basis for determination, it only improves the availability of these determinations to the regulated public.

As defined under the California Code of Regulations Section 16001(d), residential projects consist of single-family homes and apartments up to and including four stories. The residential determinations will apply only to the residential portion of the project meeting this definition. Construction of any structures or ancillary facilities on the project that does not meet this definition requires the payment of the general prevailing wage rates found in the Director's General Prevailing Wage Determinations.

To obtain residential determinations, please fax a request to (415) 703-4771 or send to the following address:

Department of Industrial Relations
Division of Labor Statistics and Research
P.O. Box 420603
San Francisco, CA 94142-0603

It is anticipated that residential determinations will be updated semi-annually as are the Director's General Prevailing Wage Determinations. An important notice will go up on DLSR's website when residential determinations are updated. If you are obtaining residential determinations and your project is not immediately advertised for bids, please refer to these important notices to make sure you are using the residential determinations in effect at the time a project is advertised for bids.

If you have any questions, please contact the Division of Labor Statistics and Research at the aforementioned address or call (415) 703-4780 and ask for the Prevailing Wage Analyst of the Week.

**IMPORTANT NOTICE TO AWARDING BODIES,
OTHER INTERESTED PARTIES, AND CD RECIPIENTS
REGARDING THE GENERAL PREVAILING WAGE DETERMINATIONS FOR THE
CRAFT OF DRIVER (ON/OFF-HAULING TO/FROM CONSTRUCTION SITE)**

The Department of Industrial Relations ("Department") conducted a wage investigation to determine the prevailing wage rate(s) for the craft of Driver (On/Off-Hauling to/from a Construction Site). Based on the results of this investigation, the Department has issued statewide prevailing wage determinations for the classifications of Dump Truck Driver and Mixer Truck Driver (see pages 2L-1 through 2L-6 and pages 2K-1 through 2K-16, respectively). These determinations will be applicable to public works projects advertised for bids on or after March 4, 2009.

The Department determined that the Dump Truck Driver rates found in the Teamsters Master Labor Agreement for on-site construction also set the prevailing rate for On/Off-Hauling to/from a Construction Site for Marin, Napa, Solano, Sonoma, and Yolo Counties. Based on the results of this investigation, this on-site determination does not apply to any other counties for On/Off-Hauling to/from a Construction Site. To find the applicable rate(s) for the Dump Truck Driver classification in Marin, Napa, Solano, Sonoma, and Yolo Counties, please refer to the prevailing wage determination for the craft of Teamster (Applies only to Work on the Construction Site) found on pages 55, 56, and 56A of the Director's General Prevailing Wage Determinations.

For CD recipients, please note the correction that determination NC-23-261-4-2005-1 for the craft of Driver (On/Off-Hauling to/from a Construction Site), page 59, is no longer applicable to public works projects advertised for bids on or after March 4, 2009. To obtain the current determinations for this craft, please visit our website at <http://www.dir.ca.gov/DLSR/PWD/Statewide.html> on or after March 4, 2009, or contact the Prevailing Wage Unit at (415) 703-4774.

On February 22, 2010, the Division of Labor Statistics and Research issued the “Notice Regarding Advisory Scope of Work for the Southern California Carpenters’ General Prevailing Wage Determination.”

In reviewing the notice on our website, the carpenters notice contains a typographical error in the last sentence of paragraph 1, “the minimum rate of pay for work in question is performed by Electricians: Inside Wiremen...”

The correct wording should be as follows, “*the minimum rate of pay for the work in question is – Electricians: Inside Wiremen...*”

Attached is the corrected notice.

REGARDING THE GENERAL PREVAILING WAGE DETERMINATIONS**

The following collective bargaining agreement has been rescinded by the signatory parties: ***Boilermaker Pipeline/Commercial Agreement between Boilermaker Employers and the International Brotherhood of Boilermakers.***

This collective bargaining agreement had been filed as the basis for recognizing this craft, classification or type of worker as prevailing. Given the rescission by the original signatory parties to the agreement in our files, there is no longer a basis for recognizing the craft of Boilermaker (For Pipelines) as a prevailing classification. Therefore, Determination S C-14-X-9-2011-1 (pg. 12-A) will no longer be in effect as of March 4, 2013.

Determination SC-14-X-9-2011-1 may continue to be used on public works projects advertised for bids on or after March 4, 2011 through March 3, 2013.

BE *Rate applies to the first 3 overtime hours Monday through Friday and the first 8 hours worked on Saturday. All other time is paid at the Sunday/holiday overtime rate.*

BF *Includes amount withheld for dues check off, which is factored in the overtime rates. Any employee working underground shall receive \$1.00 per hour in addition to regular wages.*

BG *Rate applies to first year of employment only; \$0.88 after 2 years of employment.*

BH *Rate applies to all time worked in excess of 8 hours per day or 40 hours per week and for all hours on Sundays and holidays. Rate does not include any additional amount that may be required for vacation/holiday payment.*

BI *Rate applies to first year of employment only; \$0.72 after 2 years of employment.*

- The “Shift” determination for **Nevada County** published on the 2013-1 CD and posted in Excel Format on our website inadvertently included additional footnotes. The following footnotes located AFTER footnote “T” should be omitted the “Footnotes” section of the determination.

***K** 8 hours pay for 7.5 hours worked at the straight time basic hourly rate*

Note: The shift provisions provided in the following pages provide guidance on the work hours that are applicable to each shift. Shift differential pay is required and will be enforced during each applicable shift where shift differential pay is in the determinations. Any shift provision restricting the work hours for a particular shift for a type of work will not be enforced on public works. However, if work is performed during hours typically associated with a 2nd or 3rd shift the appropriate shift rate of pay is required. Shift differential pay shall not apply to work during traditional shift hour (swing or grave) if the determination includes a footnote that indicates that the non-shift rate may be paid for a special single shift. Please note the exemptions in California Code of Regulations Section 16200 (a)(3)(F) do not waive the shift differential pay. These regulatory exemptions only apply to overtime pay. Overtime shall be required in accordance with the determination and Labor Code Section 1810 through 1815.

III.10 SHIFT WORK

When so elected by the contractor, multiple shifts of eight (8) hours for at least five (5) days' duration may be worked. When two (2) or three (3) shifts are worked:

The first shift (day shift) shall consist of eight (8) consecutive hours worked between the hours of 8:00 A.M. and 4:30 P.M. Workmen on the "day shift" shall be paid at the regular hourly rate of pay for all hours worked.

The second shift (swing shift) shall consist of eight (8) consecutive hours worked between the hours of 4:30 P.M. and 1:00 A.M. Workmen on the "swing shift" shall be paid at the regular hourly rate of pay plus 17.3% for all hours worked.

The third shift (graveyard shift) shall consist of eight (8) consecutive hours worked between the hours of 12:30 A.M. and 9:00 A.M. Workmen on the "graveyard shift" shall be paid at the regular hourly rate of pay plus 31.4% for all hours worked.

The Employer shall be permitted to adjust the starting hours of the shift by up to two (2) hours in order to meet the needs of the customer.

If the parties to the Agreement mutually agree, the shift week may commence with the third shift (graveyard shift) at 12:30 A.M. Monday to coordinate the work with the customer's work schedule. However, any such adjustment shall last for at least five (5) consecutive days' duration unless mutually changed by the parties to this agreement.

An unpaid lunch period of thirty (30) minutes shall be allowed on each shift. All overtime work required before the established start time and after the completion of eight (8) hours of any shift shall be paid at one and one-half times the "shift" hourly rate.

There shall be no pyramiding of overtime rates and double the straight rate shall be the maximum compensation for any hour worked. There shall be no requirement for a day shift when either the second or third shift is worked.
